

# THE HAGUE = APRIL 2018

# **CONNECTATHON**APRIL 16-20

### 2018 IHE-Europe Connectathon

- A week-long connectivity test marathon during which face-to-face testing of participating products', is conducted using validators to show interoperability between systems following clinical workflows. Several thousand transactions are verified using both recognised test tools and peer tests.
- Vendors large and small ensure that systems interoperate in a controlled, supervised and neutral environment. They collaborate to solve issues and demonstrate competency with successful completions being registered in the Connectathon Results Matrix at the end of the Connectathon; all taking place under the watchful eye of IHE Monitors.

## **SYMPOSIUM** APRIL 17

### **IHE-Europe Symposium**

- An annual symposium that takes place during the Connectathon Week attended by delegates including vendors, policy makers, users and experts in interoperability.
- This year's theme focuses on "Getting the Basics Right, Key Success Factors in Interoperability". The format, delivered by an international faculty, comprises key note presentations on Strategic Updates, Best Practices for Deployments, an open Panel Discussion with Q & A opportunities and includes VIP Tours of the Connectathon floor. ### mHEALTH PLUGATHON APRII 17-18

#### mHealth Plugathon

- An opportunity for the Mobile apps development community, smart startups wanting to access the healthcare arena and established vendors looking to expand into mobile to test their apps with the APIs from vendors of health IT solutions.
- Likewise API developers can see if their APIs are attractive to the app developing world, see how standards-compliant their services are and improve them on the spot.
- Using existing IHE Profiles for mobiles, learning and enhancing knowledge through educational seminars and networking are all part of the Plugathon event.

# PROJECTATHONS APRIL 16-20

#### **Projectathons**

- Two Projectathons covering both European and regional projects testing end-to-end interoperability with a number of vendors large and small based on IHE Profiles and using health data exchange in real deployment scenarios.
  - o The Swiss EPR solution a national project of collaborative interoperability.
  - o The German EFA which links hospitals together with differing solution providers.
- Both Projectathons involve large and small vendors testing their solutions and working together to address any issues on the fly thereby ensuring deployment in the field will be error-free.
- Minutes spent in this environment can lead to hours and days saved in field deployment.
