Xt-EHR Projectathon and IHE Plugathon for EHDS
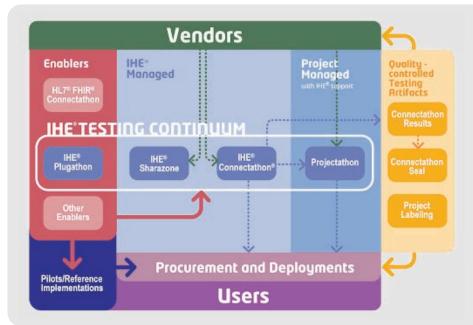

What's the difference?

PLUGATHON & PROJECTATHON

IHE Plugathon and **Xt-EHR Projectathon** events create a seamless testing pathway enabling organisations to progress from innovation to fully validated interoperability.

These events are part of the **IHE Connectathon Week testing pathway**:

- **IHE Plugathon**: an early exploratory phase where developers and vendors test new technologies, APIs for health IT solutions, and EHDS-relevant IHE Integration Profiles in a flexible, hands-on environment tailored to specifications.
- **Xt-EHR Projectathon**: provides a more structured, broader validation, where multiple implementations are tested against IHE Integration Profiles and interoperability standards, defined for a specific deployment project. In this case the Xt-EHR EU co-funded Project in charge to prepare the specifications toward the EHDS implementation Acts.

IHE PLUGATHON for EHDS
In collaboration with HL7 Europe

PROJECTATHON
Xt EHR @dataspace · Co-funded by the European Union

EU Projects specific test cases EUDI Wallet, Yellow button, etc	**EHDS implementation Specifications** based on the Xt-EHR deliverables

IHE Profiles
IHE Profiles referenced within Xt-EHR Deliverables

HL7 Europe FHIR Implementation Guides
EPS/IPS, EU MPD, Imaging, HDR, Lab Report, eP/eD

Improved specifications	**Award certificate of projectathon participation**

IHE
Integrating the Healthcare Enterprise
EUROPE

SHALL I ATTEND PLUGATHON OR PROJECTATHON ?
WHAT'S THE DIFFERENCE?

	IHE Plugathon for EHDS	**Xt-EHR Projectathon**
IF YOU ARE INTERESTED IN...	Validating usability of upcoming specs or getting to know technical details of EEHRxF	Validating specification implementations by products in EHDS scenarios
WHAT WOULD YOU TEST...	Specifications proposed to support EHDS implementation	Specifications proposed to support EHDS implementation
MATURITY LEVEL	Early concepts, experimental features	Specifications close to real-world adoption and procurement
TARGETED GROUPS	Innovators, developers, research teams, EU projects	Vendors with their systems, national authorities
VALIDATION SUPPORT	Tests performed autonomously with project facilitators checks	Monitors mandated by the project for test verification
WHAT WOULD YOU GET...	Early insights on specs, rapid prototyping, roadmap alignment, improved spec maturity	Demonstration of applicability and market interest in the proposed specifications, which are based on Xt-EHR input

WHERE TO REGISTER

IHE Plugathon for EHDS

Who	How much	Information
EU funded project (xShare, i2x and MyHealth@MyHands)	550 €	1/2 day Educational 2 days Testing Lunch + Coffee breaks
Regular participant	850 €	

Xt-EHR Projectathon

[Register here]

Who	How much	Information
Vendors registered in the Connectathon floor	€0 per system and €450 per additionnal participant	3 days Projectathon Lunch + Coffee break
Vendors or **Organisations** NOT registered in the Connectathon floor	€790 per system and €450 per participant
