

IHE[®] | EXPERIENCE EUROPE | DAYS | 3-4 JUNE 2024

XpanDH – Driving the xpansion of the EEHRxF ecosystem

Anderson Carmo – Iscte PT

Sponsored by

Agenda

- XpanDH Overview
- XpanDH main outputs
 - X-Bundles
 - X-Bubbles
 - Readiness model
 - X-Nets
 - 3C-3P
- Next steps

Simon Lewerenz
EU Digital Health and
Interoperability Projects

Main XpanDH outputs

- X-Bundles
- X-Bubbles
- Readiness model
- X-Nets
- 3C3P community

The **X-Bundle** correspond to a **group of well-defined interoperability assets** that provide the necessary conditions along the Refined eHealth European Interoperability Framework ReEIF six dimensions (Legal, organizational, semantic, technical, cybersecurity and person-readiness/digital capabilities).

It will **support** that a simple or composite **adoption domain be able to be implemented in two or more connecting ends** of an EEHRxF-compatible sharing health data connection.

A single-entry point for the **X-Bundle assets** has **been created**, it gives access to a coherent ecosystem of **technical specifications**, in the form of **HL7 FHIR IGs**, and github repositories **covering different priority domains** (e.g. Laboratory, Hospital Discharge Report).

Official URL: http://hl7.eu/fhir/ig/xpandh/ImplementationGuide/hl7.eu.fhir.xpandh	Version: 0.1.0
Draft as of 2023-10-05	Computable Name: XpandhIg

Note

The specification herewith documented is for the time being a working specification, and may not be used for any implementation purposes. No liability can be inferred from the use or misuse of this specification, or its consequences.

Contents:

- Scope
- XpanDH Guides structure
- The project
- XpanDH Adoption Domains/X-Bubbles
- Dependencies
- Cross Version Analysis
- Global Profiles
- Authors and Contributors

1.1 Scope

This is the access point for the XpanDH project HL7 FHIR Implementation Guides, created to assist the work of the pilots for the XpanDH experimentation bubbles.

1.2 XpanDH Guides structure

The following figure shows the relationships among the artefacts of interest for this guide

```

graph TD
    ThisGuide[This guide] --- GitHubXpanDH[(GitHub XpanDH)]
    ThisGuide --- LabIG[Laboratory Report IG]
    ThisGuide --- HDRIG[Hospital Discharge Report IG]
    ThisGuide --- PSIG[Patient Summary IG]
    LabIG --- LabRepos[(GitHub Lab repos

    HDRIG --- HDRRepos[(GitHub HDR repos  
Includes examples and other artefacts)]
    PSIG --- PSRepos[(GitHub PS repos  
Includes examples and other artefacts)]
  
```

We are **organizing the existing X-bundles** produced within the narrow EEHRxF community of projects, according to their **intended use, production status and adoption level**.

The focus on the assets that have the **maturity and adoption level** to be used directly for deployment:

- a) **assist implementors in Member States** to incorporate the Format into their national projects as well as
- b) **industry to build interoperability** into the design of their innovations.

X-format ecosystem

IHE-Europe EXPERIENCE DAYS 2024

To ensure the reuse of the **X-bundles** produced on XpanDH, and the broader assets sustainability, we are organizing some joint activities with **xShare and Xt-EHR** to:

- **Refinement of the concepts**
- **Development and publication** of the X-Bundles for the selected business use cases
- **Defining quality labelling metadata** for the assets and the bundles

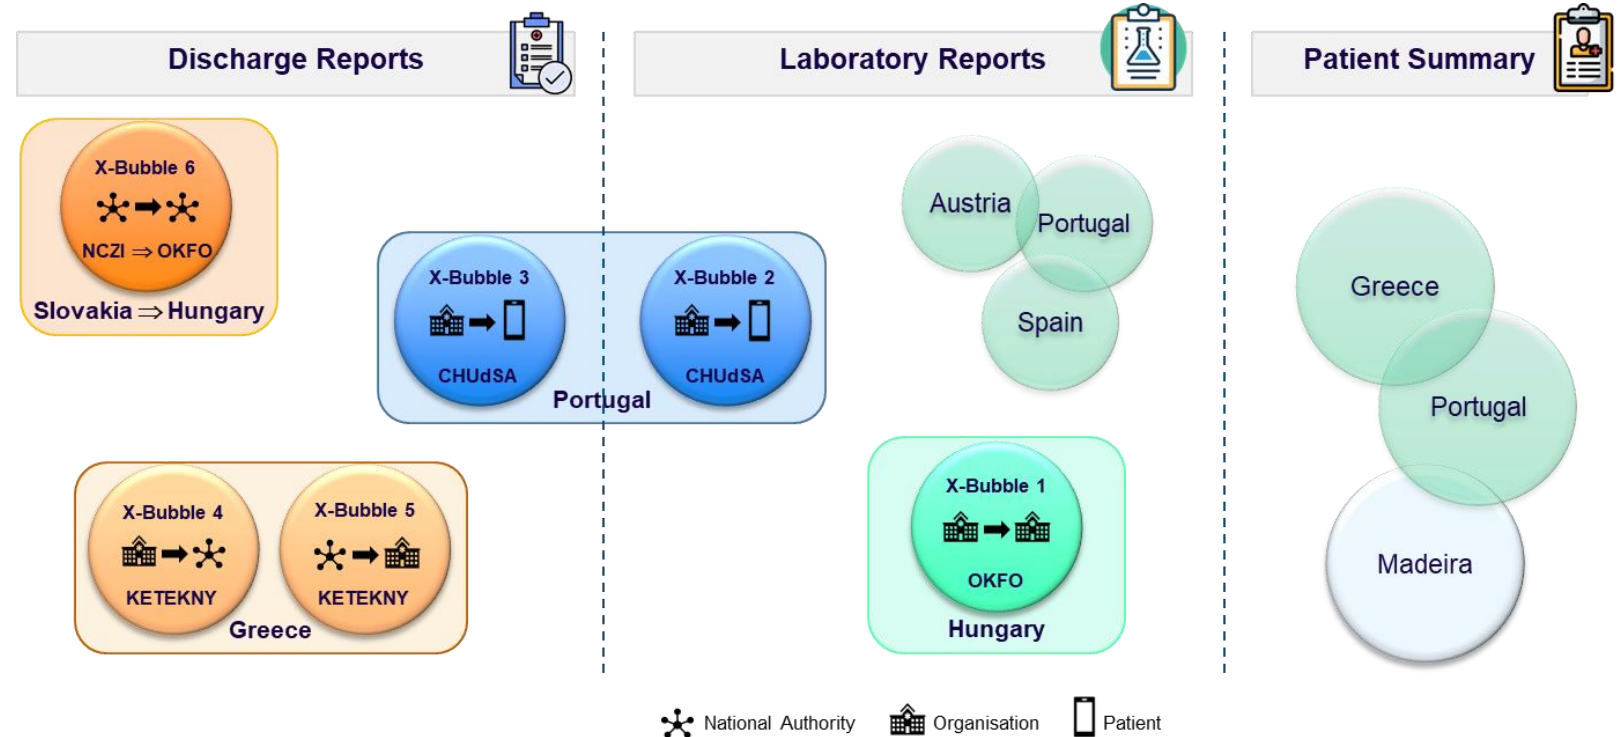

X-Bubbles are groups of organizations that test the **feasibility** of using use of EEHRxF.

Bubbles levels:

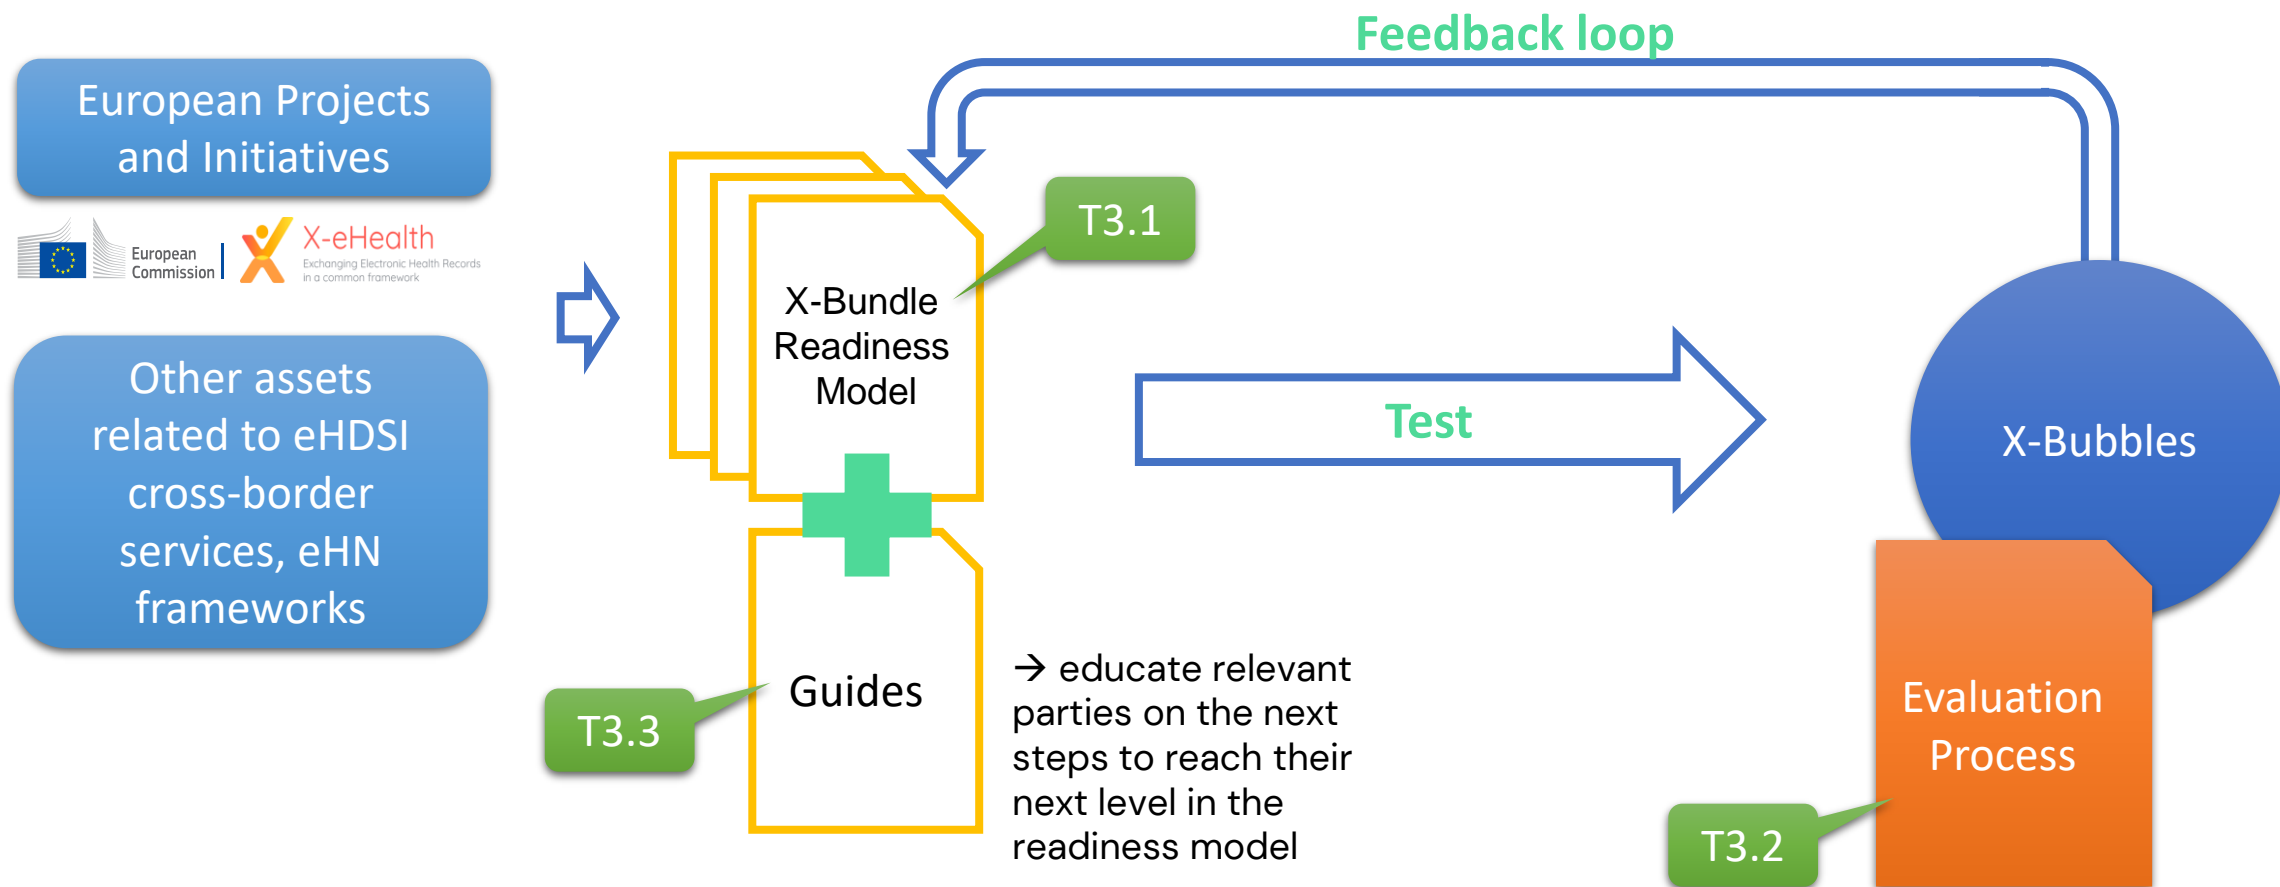

- Follow up
- Level 1 – "Real testing"
- Level 2 – Realignment
- Level 3 – In silico

XpanDH --> xShare Adoption Sites (use and demo the xShare Button)
X-Bubbles --> i2X demonstrators (in-service use) of EEHRxFormat-adapted EHRs (feasibility)

Field	Bubble 1 Hungary	Bubble 2 Portugal	Field	Bubble 1 Hungary	Bubble 2 Portugal
A.1 Report header data elements			A.1.8 Laboratory report metadata (9)	6 mandatory 1 optional 2 not required	6 mandatory 2 optional 1 not required
A.1.1 Identification of the patient/subject (5)	4 mandatory 1 optional	5 mandatory	A.2 Order information (6)	6 optional	1 mandatory 5 not required
A.1.2 Patient/subject related contact information (2)	2 optional	1 optional 1 not required	A.3 Order reason (1)	1 optional	1 optional
A.1.3 Health insurance and payment information (4)	4 not required	2 optional 2 not required	A.4 Specimen information (9)	9 optional	9 optional
A.1.4 Information recipient (6)	6 not required	1 mandatory 3 optional	A.5 Results data elements		
A.1.5 Author (3)	3 mandatory	1 mandatory 2 optional	A.5.1 Laboratory report narrative (2)	1 mandatory 1 optional	1 mandatory 1 optional
A.1.6 Legal authenticator (4)	2 mandatory 2 optional	1 mandatory 3 optional	A.5.2 Observation details (14)	4 mandatory 8 optional 2 not required	6 mandatory 7 optional 1 not required
A.1.7 Result validator (4)	3 mandatory 1 optional	4 optional			

Healthcare providers

- eHealth Agency
- Hospital or Hospital provider
- Daycare clinic
- Community Healthcare provider (General practitioner, Laboratory, Radiology department, ...)
- Community Pharmacy
- Nursing home
- Other

Vendors

- Electronic Medical Record (EMR) vendors
- Hospital Information System (HIS) vendors
- Laboratory Information Systems (LIS) vendors
- Other

Readiness aspects

Processes
IT Implementation
Care professionals

3 aspects (Processes, IT Implementation, Care professionals)

- Policy, Finance and Change Management, Care processes, Clinical documentation, Availability of systems, Testing

Structure supports completion by different people in the organization

Types of entities
Healthcare providers
Vendors

EEHRxF
use-cases
Laboratory
Result Report
Hospital
Discharge
Report

Readiness Model consists of ...

- ... general parts (use-case independent)
- ... use-case specific parts

“Generic” – can be extended by more use-cases

Current use-cases covered:

- Laboratory Result Report
- Hospital Discharge Report

Readiness model – Learnings on the way

- **Readiness Model will be sent to a large number of organizations**
 - Pre-knowledge on the EEHRxF can not be assumed
 - Must be self-explaining
 - Educational character
- **Survey is complex and touches several different areas**
 - Multiple persons of different departments will likely answer the survey
 - The structure must correspond to this
 - Tool selection is important (must allow “save-as-draft”)
- **Quantifiable questions preferred**
 - However, narrative questions are not avoidable

X-Nets

are networks of organisations

direct healthcare will involve European Economic Network Association of Star Orga

X-Net activation

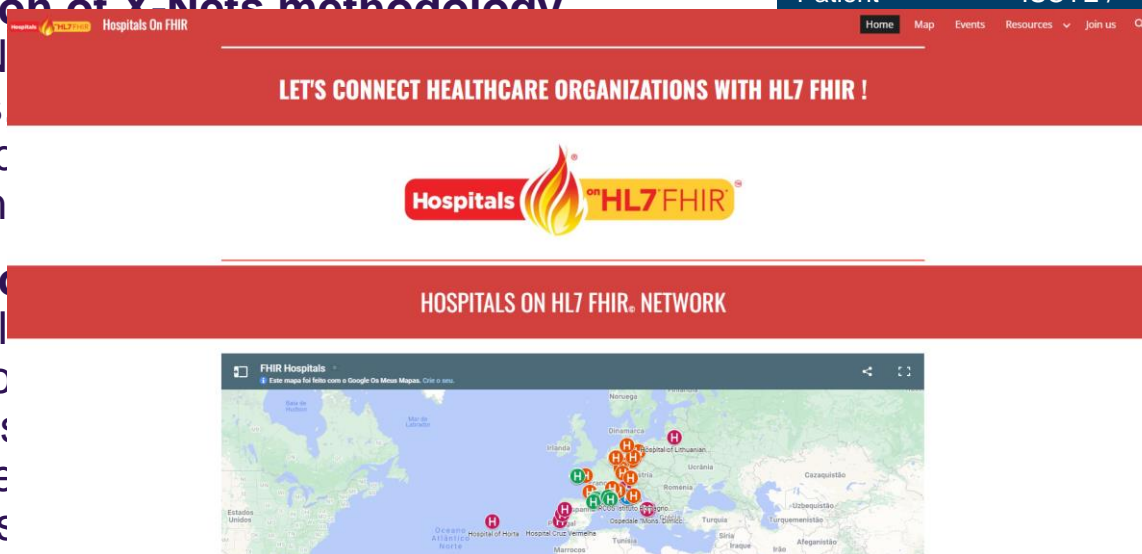

Co-creation of X-Nets methodology

X-Nets involve and with creation of outdolo characteristics and changes

X-Net members invited through consortium contacts, also through contacts from summit

Community of Doers and Co-creators:

To bring together implementers and end-users of new and existing solutions:

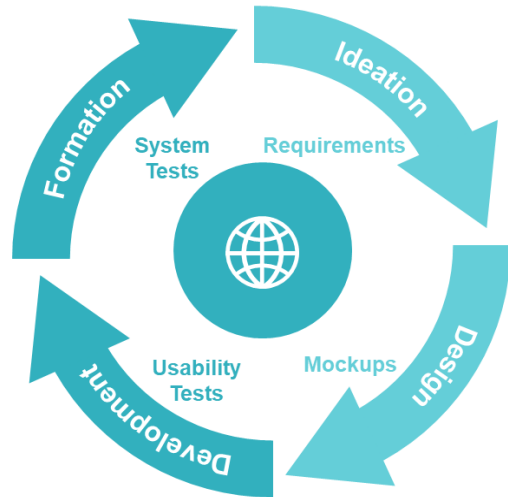

- IT developers and vendors/suppliers;
- patient and healthcare professionals,

in a **3C-3P community** (co-creation Community of Patients, Professionals and Programmers)

The Community Assets

- **EEHRxF specifications** as they are proposed as Standards and technical Artifacts
- **X-Bundles**
- Coverage of **all EEHRxF documents**
- **Testing tools**
- **Software components**
- The **Readiness model** of EEHRxF

Some initial use cases

● Cancer patient related use cases	24
● Rare disease related use cases	11
● Patient experience reporting	28
● Patient access reporting	25
● Deployment of national EHR Sol...	26
● Medical imaging and reports	15
● Active ageing use cases	15
● Patient mediated sharing of doc...	30
Other	10

Plugathon

Setting up XpanDH's ideas

27 June,
Setting up XpanDH's
Community of Doers and
Co-creators

ΕΛΛΗΝΙΚΗ ΟΜΟΣΠΟΝΔΙΑ ΚΑΡΚΙΝΟΥ

2 July,
In collaboration with ELLOK &
XpanDH's Community of Doers
and Co-creators

- Organisation of the **2° EEHRxF Expert Summit (2024)**
- **X-Bundles** – consolidate the assets and prepare its sustainable handover
- **Readiness model** – refinement of the models and test among the stakeholders and x-nets
- **X-Bubbles** – evaluate the development of each bubble, including the in-silico ones
- **X-nets** – launch all the x-nets, prepare for a 2nd Multi-Stakeholder focus group, consult the x-nets about the project's developments
- **3C3P** – selection of use-cases to be initially developed on the events (hackathons, plugathon, etc.)
- **XpanDH ends** in DEC – handover & final event in LISBON

SAVE THE DATES for LISBON –

16-17-18 Dec

XpanDH Project Handover & Final Event

Venue: ISCTE (in Lisbon Centre)

Thanks!
